

M-DETECT

METAL DETECTABLE ELASTOMER COMPOUNDS

METAL DETECTABLE ELASTOMER COMPOUNDS FOR CONTAMINATION DETECTION AND CONTAINMENT IN THE PHARMACEUTICAL AND FOOD PROCESSING INDUSTRIES

M-DETECT range includes:

- ✓ moulded O-rings
- ✓ sanitary gaskets for pipe couplings
- ✓ custom-designed components

M-DETECT is available in:

- ✓ EPDM
- ✓ Nitrile
- ✓ Silicone
- ✓ Fluorocarbon (FKM)

All materials are compliant to FDA CFR 21: 177.2600

M-DETECT properties:

- ✓ early contamination detection and containment
 - reduces any loss of production
 - increases productivity
- ✓ compliant to FDA CFR 21: 177.2600
- ✓ free from any animal-based ingredients (ADI-free)
- ✓ available in black and blue for easy visual identification

Fragments of M-DETECT as small as 2 mm can be identified by in-line metal detection equipment in process lines.
